

## FINAL PUBLIC NOTICE

The Federal Emergency Management Agency (FEMA) has received the subgrant application for Roman Catholic Archdiocese of Miami's St. Joseph Towers and Residence repairs due to damages in Hurricane Irma (DR-4337-FL PW 08097). Pursuant to Executive Order 11988 and 44 CFR Part 9.12, final notice is hereby given of FEMA's intent to provide funding for this project under the Public Assistance (PA) Program.

An initial disaster-wide Public Notice was published October 06, 2017 for Hurricane Irma. Comments and other information received were fully evaluated by FEMA along with evaluation of social, economic, environmental, and safety considerations. This notice serves as a project-specific final notice for FEMA's funding action located within the floodplain.

Funding for the proposed project will be conditional upon compliance with all applicable federal, tribal, state and local laws, regulations, floodplain standards, permit requirements and conditions. This action complies with the National Flood Insurance Program (NFIP) requirements.

- Responsible Entity:** FEMA Public Assistance (PA) Program
- Applicant:** Roman Catholic Archdiocese of Miami
- Project Title(s):** PA-04-FL-4337-PW-08097; St. Joseph Towers & Residence
- Location of Proposed Work:** 3475 NW 30th Street, Lauderdale Lakes, Florida 33311 (26.16404, -80.19264); 3485 NW 30th Street, Lauderdale Lakes, Florida 33311 (26.16381, -80.19339)
- Floodplain:** Project is a critical action located in the Flood Zone Shaded X, otherwise known as the 500-year floodplain, per Miami-Dade County FIRM Panel #12011C0362H dated 08/18/2014.
- Proposed Work and Purpose:** The Roman Catholic Archdiocese of Miami completed repairs to building interiors, roofing, and a catch basin at St. Joseph Towers. Building interior repairs include ceiling, carpet, a fire alarm, a window, drywall, baseboard molding, exhaust fans, interior light fixtures, and bathroom vanities and plumbing. At the St. Joseph Residence, a storm shutter lock, carpet, roofing, a door, stucco walls, ceiling, A/C unit and components, an exhaust fan, and exterior light pole and fixtures were replaced. All repairs were up to current codes and standards, and an Emergency Management Plan exists for the building that identifies steps to minimize flood damage.
- Project Alternatives:** An alternative location is not practicable as elements are part of a larger facility and relocation may adversely impact social or economic resources for the community. The no action alternative is not feasible as the facility would continue to be vulnerable to further damages and pose safety hazards to the occupants and visitors.
- Comments:** This will serve as the final public notice regarding the above-described action funded by the FEMA PA program. Interested persons may submit comments, questions, or request a map of this specific project by writing to the Federal Emergency Management Agency, Region 4, 3003 Chamblee-Tucker Road, Atlanta, Georgia 30341 or by emailing FEMA-R4EHP@fema.dhs.gov. Comments should be sent in writing with the subject line FL-4337-PW-08097, Roman Catholic Archdiocese of Miami at the above address within 15 days of the date of this notice.
